PROFESSIONAL PROFILE

Master's student in Distributed Systems and AI (ENSET Mohammedia), I design secure Full Stack applications that integrate AI (ML, NLP, LLM, multi-agent systems), using a DevOps approach and a microservices-oriented architecture. With a background in networks and cybersecurity, I build security in from the design stage.

OBJECTIVE

Seeking a paid 5–6 month end-of-studies internship (February – June 2027) in Full Stack development (Java / Spring Boot, Angular), AI (LLM, multi-agent systems) or DevOps. On-site in Morocco or remote.

TECHNICAL SKILLS

Full Stack Development	Java, Spring Boot, Spring Security, JPA, REST API, Angular, React, TypeScript, Node.js, HTML, CSS, JavaScript
Software Architecture	JEE, middleware, distributed systems, microservices, UML
Artificial Intelligence	Machine Learning, Deep Learning, NLP, Transformers, LLM, generative AI, agentic AI, multi-agent systems
AI Languages & Frameworks	Python, scikit-learn, TensorFlow, PyTorch, Hugging Face, LangChain
Data	SQL (MySQL), NoSQL, Big Data, semantic web
DevOps & Security	Docker, CI/CD, Linux, systems security, Kali Linux, auditing
Tools & Collaboration	IntelliJ IDEA, Visual Studio Code, Maven, Git/GitHub, Jira, Slack

ACADEMIC PROJECTS

Intelligent multi-agent system for language learning (SMA) GitHub
Python, AI agents, LLM — collaborative AI agents that support learners in studying a language.

eBanking Enterprise: full stack banking platform GitHub
Spring Boot, Angular, REST API — complete banking application with a secure back end and a front-end interface.

Heab Task Manager: AI-assisted desktop task management application GitHub
Java 21, JavaFX, MySQL, Docker — Kanban board, real-time notifications, Google Calendar synchronization, AI chat.

Intelligent real-time bank fraud detection system
Python, Machine Learning — AI model that classifies transactions and detects fraudulent behavior.

SaharaTours: full stack tourist booking platform GitHub
Spring Boot, Spring Security (JWT), React, Tailwind CSS, MySQL, Docker Compose — booking of activities and transport in Morocco, with an AI chatbot (Google Gemini).

Security audit and hardening of an information system
Kali Linux — vulnerability identification, followed by the implementation of hardening measures.

INTERNSHIPS

Rancho Academy (rancho.ma) — Full Stack Development Intern April – June 2025
Spring Boot, Angular, MySQL
- Developed features of the web platform: management of books and courses.
- Designed and built REST APIs (Spring Boot) consumed by the Angular front end.
- Implemented user management, with data persisted in MySQL.

École Supérieure de Technologie de Beni Mellal (EST BM) May 20 – June 20, 2024
Linux, networking — configuration and administration of a local network and servers.

Center Tawsna July 2023
IT maintenance — introductory internship, technical support for users.

EDUCATION

Master's in Distributed Systems and AI (SDIA) — ENSET Mohammedia — 2nd year (in progress)
Bachelor's Degree in Cybersecurity — École Supérieure de Technologie, Beni Mellal (ESTBM) — 2025
BTS in Artificial Intelligence (independent candidate) — Beni Mellal (BTSBM) — 2025
BTS in Computer Systems and Networks — Beni Mellal (BTSBM) — 2024
Baccalaureate in Physical Sciences — Lycée Zerktouni — 2022

LANGUAGES

Arabic (native), **French** (fluent), **English** (fluent)
