PROFESSIONAL SUMMARY

Master's student in Distributed Systems and AI (ENSET Mohammedia), I design secure Full Stack applications that integrate AI (ML, NLP, LLM, multi-agent systems) with a DevOps approach. With a background in networking and cybersecurity, I build security in from the design stage.

OBJECTIVE

Seeking a final-year internship (PFE) in AI and Full Stack development at an IT company.

TECHNICAL SKILLS

Full Stack Development	Java, Spring Boot, Spring Security, JPA, API REST, Angular, TypeScript, Node.js, HTML, CSS, JavaScript
Software Architecture	JEE, middleware, distributed systems, microservices, UML
Artificial Intelligence	Machine Learning, Deep Learning, NLP, Transformers, LLMs, Generative AI, multi-agent systems
AI Languages & Frameworks	Python, scikit-learn, TensorFlow, PyTorch, Hugging Face, LangChain
Data	SQL (MySQL), NoSQL, Big Data, semantic web
DevOps & Security	Docker, CI/CD, Linux, systems security, Kali Linux, auditing
Development tools	IntelliJ IDEA, Visual Studio Code, Maven
Collaboration tools	Slack, Git/GitHub, Jira

ACADEMIC PROJECTS

Intelligent real-time bank fraud detection system
Python, Machine Learning, anomaly detection

AI model that classifies banking transactions and flags fraudulent behavior in real time.

Security audit and hardening of an information system
Kali Linux, vulnerability analysis, hardening

System audit: identification of vulnerabilities, followed by the implementation of hardening measures.

SaharaTours: web platform for tourist booking management GitHub
Web booking application

Management of tourist offers and bookings.

eBanking Enterprise: full-stack banking platform GitHub
Spring Boot, Angular, REST API, back-end / front-end architecture

Complete banking application: secure back end and front-end interface.

Intelligent multi-agent system for language learning (SMA) GitHub
Python, AI agents, LLM

Collaborative AI agents that guide learners through language learning.

Heab Task Manager: AI-assisted desktop task management application GitHub
Java 21, JavaFX, AtlantaFX, MySQL, Docker

Kanban boards, real-time notifications, Google Calendar sync, AI chat; MySQL containerized with Docker.

EDUCATION

Master's in Distributed Systems and AI (SDIA) — ENSET Mohammedia — 2nd year (current)
Bachelor's in Cybersecurity — School of Technology, Beni Mellal (ESTBM) — 2025
BTS in Artificial Intelligence (independent candidate) — Beni Mellal (BTSBM) — 2025
BTS in Computer Systems and Networks — Beni Mellal (BTSBM) — 2024
Baccalaureate in Physical Sciences — Lycée Zerktouni — 2022

LANGUAGES AND INTERESTS

Languages: Arabic (native), French (fluent), English (fluent)
Interests: Internship at Center Tawsna, internship at EST BM, company specialized in IT and training
