Portfolio: hichamouaouche.github.io/portfolio-Web

TECHNICAL SKILLS

Full Stack Development
Java, Spring Boot, Spring Security, Spring Data JPA, API REST, Angular, TypeScript, Node.js, HTML, CSS, JavaScript

Architecture & Software Engineering
JEE, middleware, distributed systems, microservices, UML

Artificial Intelligence
Machine Learning, Deep Learning, NLP, Transformers, LLMs, Generative AI, multi-agent systems

AI Languages & Frameworks
Python, scikit-learn, TensorFlow, PyTorch, Hugging Face, LangChain

Data
SQL (MySQL), NoSQL, Big Data, semantic web

DevOps & Security
Docker, CI/CD, Linux, systems security, Kali Linux, auditing

Development tools
IntelliJ IDEA, Visual Studio Code, Maven

Collaboration tools
Slack, Git/GitHub, Jira

INTERESTS

- Internship at Center Tawsna
- Internship at EST BM
- Company specialized in IT and training

LANGUAGES

Arabic: native
French: fluent
English: fluent

HICHAM OUAOUCHE

Full Stack Developer (Java Spring Boot, Angular) & AI Engineer

PROFESSIONAL SUMMARY

Master's student in Distributed Systems and AI (ENSET Mohammedia), I design secure Full Stack applications that integrate AI (ML, NLP, LLM, multi-agent systems) with a DevOps approach. With a background in networking and cybersecurity, I build security in from the design stage.

OBJECTIVE

Seeking a final-year internship (PFE) in Artificial Intelligence and Full Stack development at a company in the IT sector.

ACADEMIC PROJECTS

Intelligent real-time bank fraud detection system

Python, Machine Learning, anomaly detection

AI model that classifies banking transactions and flags fraudulent behavior in real time.

Security audit and hardening of an information system

Kali Linux, vulnerability analysis, hardening

System audit: identification of vulnerabilities, followed by the implementation of hardening measures.

SaharaTours: web platform for tourist booking management

Web booking application

Management of tourist offers and bookings. GitHub

eBanking Enterprise: full-stack banking platform

Spring Boot, Angular, REST API, back-end / front-end architecture

Complete banking application: secure back end and front-end interface. GitHub

Intelligent multi-agent system for language learning (SMA)

Python, AI agents, LLM

Collaborative AI agents that guide learners through language learning. GitHub

Heab Task Manager: AI-assisted desktop task management application

Java 21, JavaFX, AtlantaFX, MySQL, Docker

Kanban boards, real-time notifications, Google Calendar sync and interactive AI chat; MySQL database containerized with Docker. GitHub

EDUCATION

Progressive path: networking, cybersecurity, then specialization in AI and distributed systems.

Master's in Distributed Systems and Artificial Intelligence (SDIA)
ENSET Mohammedia, 2nd year (current)

Bachelor's in Cybersecurity
School of Technology, Beni Mellal (ESTBM), 2025

BTS in Artificial Intelligence (independent candidate)
Beni Mellal (BTSBM), 2025

BTS in Computer Systems and Networks
Beni Mellal (BTSBM), 2024

Baccalaureate in Physical Sciences
Lycée Zerktouni, 2022
